The Missouri S&T Provost’s eFellows Program was established to improve student learning using best practices in online and blended teaching. Through the program, the CAFE provides funding, consultation and design support for online and blended course development.

Strong preference will be given to proposals that are partially or fully matched by one or more departments. That match can be in dollars, release time, or other means.

Additional preference considerations will also be given to any of the following:

- Lecture/Lab Alignment
- Courses including online sections
- Projects building upon the work of previous eFellows which use those eFellows as eMentors.

Full-time faculty are invited to submit proposals requesting funds for creating new or revising current courses to be delivered online or in a blended format. Proposals should reflect departmental and campus priorities.

Goals of the eFellows Program:
- Increase the quality of online and blended courses at Missouri S&T
- Implement teaching technology using course design best practices
- Improve student learning assessed through accreditation outcomes (HLC, ABET, etc.)
Missouri S&T Provost’s eFellows Program 2021-2022

Application Process:

1. Submit a Letter of Intent, due Friday, June 11, 2021 - Letter of intent should include: a) Course Name and number, b) Names of Co PIs (if applicable)

2. Upon receipt of the Letter of Intent, CAFE will send a copy of the proposal template to the applicant. You are welcome to schedule a consultation with an Instructional Designer to assist with the eFellows proposal.

3. Submit a Project Proposal, due July 16, 2020 - Projects should be completed and taught no later than one year after beginning the eFellows program

4. Notification for successful applicants will be no later than August 6, 2021

If your application is accepted, the eFellows program includes the following requirements:

- Collaboration with a CAFE team member
- Engagement with eFellows faculty peers in workshops
- Implementation of UM eLearning best practices
- Presentation of your work at the S&T Innovation in Teaching & Learning Conference (ITLC) in 2023 or 2024
- Agreement to mentor the following year’s eFellows award recipients

Participation in the eFellows program ensures instructional design and teaching technology proficiency. You will also improve your own assessment practices, and enhance your students’ learning.
