

Grant Recipient

Dr. Daniel B. Shank
Assistant Professor
Psychological Science

Activities

- ❖ What did you do? I gave a presentation titled “Affective Sentiments as a Basis for Understanding Morality in Robots”
- ❖ Who did you meet with or network with? All members of this workshop were invited and each gave a presentation with ample time to discuss and comment. I now have made connections with several key leaders in this field.

Proposal

- ❖ International Workshop on Morality and Robots: Moral HRI, Tokyo Japan, Nov 30 - Dec 1, 2018
- ❖ \$1000 to defray cost of flight (\$1000+), hotel (\$500+) and other expenses
- ❖ This is my first time as an invited speaker at a conference. It gave me the opportunity to interact with leaders studying morality and robots in US and Japan

Outcomes

- ❖ I met leaders in the field and learned about their research and they learned about mine.
- ❖ I expect to maintain contact and share some information with members of this group. I believe there is a high likelihood of seeing these academics at other conferences, sharing information with them, being invited to other conferences or special publications with them, and collaborating with them.
